

# Putting money in your pockets

## The challenge

Our client, with numerous office leases across Canada, had not audited any of their leases for several years. They felt that considerable overbillings could have been recovered from their landlords to generate significant savings.

## The solution

We were mandated to plan and execute a lease audit strategy. We proceeded to audit all major office leases across Canada.

## The results

Our audits resulted in recovery of over \$1 million dollars of overpayments with some audits still ongoing. This process will also prevent erroneous billing practices from continuing.
